

public class FILE NAME to work
System.out.println () is a program function
Use NPP EXEC to run and start program processes
Should see all green before moving onto running more processes
() usually specify the file name
Use // to name commands within NPP Execute

```
Public class FILE NAME
{
    Public static void main (String [ ] args)
    {
        System.out.println ("MESSAGE");
    }
}
```
